Nel 1902 Alfredo Tessieri fondò a Lucca una piccola bottega che in via delle Conce produceva pavimenti Art Nouveau. Dopo 120 anni la famiglia Tessieri è ancora la padrona di casa e cinque generazioni di artigiani hanno salvaguardato e coltivato l'arte delle mattonelle fatte a mano.

Cementine Graniglie

Le cementine e le graniglie Tessieri sono del tipo più antico detto *in doppio strato*.

Cementine

Mattonelle in pasta di cemento in cui un primo strato superficiale *nobile* di 5mm realizzato in cemento, polvere di marmo e pigmenti colorati, si sovrappone ad un secondo strato in cemento e sabbia lavata di cava.

Graniglie

Mattonelle in graniglia in cui un primo strato superficiale *nobile* di circa 1 cm realizzato in cemento, polvere di marmo, granulati di rocce e pigmenti colorati, si sovrappone a un secondo strato in cemento e sabbia lavata di cava.

Dietro ogni mattonella c'è una persona

Pezzi unici - gli uni mai uguali agli altri - collezioni su misura, gusto artigianale; tutto in azienda custodisce gelosamente l'essenza e i valori di una volta, promettendo il sogno di massima esclusività. Ignoriamo le tendenze e la produzione per il mercato di massa: solo sessanta mattonelle al giorno circa.

Preparazione dei colori, composizione dell'impasto, colatura nello stampo, stagionatura determinano il tempo necessario perchè ogni mattonella Tessieri erediti il valore che merita. Nessuna macchina disturba i gesti della tradizione.

Cementine

Polvere di marmo, pigmenti colorati, sabbia lavata di cava e cemento

Tinta unita

I possibili accostamenti di mattonelle monocrome consentono la realizzazione di infinite composizioni inedite e mai banali con cui arredare ogni spazio di casa. Colori e formati possono essere combinati assecondando gusti e ispirazioni per dare vita a rivestimenti unici.

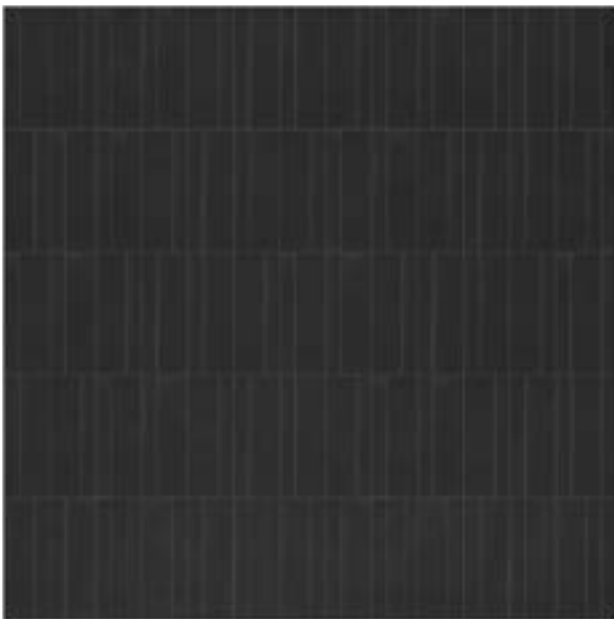

Colori e abbinamenti sono selezionabili a piacere.

Informazioni generali

I colori

- La tecnica utilizzata per creare ogni colore è interamente artigianale, dunque ogni leggerissima stonizzazione nelle varie produzioni di mattonelle è il segno di autenticità del processo manuale.
- Gli aloni e l'effetto nuvolato tipici delle cementine non sono da considerarsi difetti ma fattori che ne evidenziano la produzione completamente artigianale.
- Il colore delle mattonelle in graniglia - ad eccezione di quello della base cementizia - dipende dal mix di granulati presenti nell'impasto (tipo di roccia, dimensione e percentuale dei grani).
- Utilizzando la tipologia in grana fine o media è possibile produrre mattonelle in graniglia decorate a disegno, mentre la grana grossa consente di realizzare pavimenti geometrici in cui l'elemento base è la singola mattonella.

Informazioni generali

Per la posa

- Le prestazioni nel tempo di un pavimento in graniglia o cemento dipendono fortemente dalle caratteristiche del supporto di posa e dunque dalla qualità di esecuzione del massetto (levigato e ben asciutto).
- Nel caso di applicazione esterna è necessario procedere con la posa solo e soltanto a seguito di un trattamento idrorepellente sul massetto.
- Per garantire il risultato estetico desiderato, si raccomanda una pre-posa con cui visualizzare in anteprima l'esito dell'applicazione.
- La posa di graniglie e cementine richiede l'utilizzo di collante per marmo, da stendere sia sul massetto che sulla mattonella affinché il livellamento sia ben accurato.
- La fuga normalmente consigliata è di circa 2mm mentre per il suo riempimento - a pavimento asciutto - è opportuno utilizzare boiacca di cemento.
- Per la realizzazione delle fughe è possibile richiedere presso Tessieri lo stesso cemento colorato utilizzato durante la produzione delle mattonelle, caratterizzato da una gamma cromatica differente rispetto alla tipologia industriale, e che meglio si abbina ai colori scelti per il pavimento.
- In presenza di sistemi radianti non esiste alcuna controindicazione riguardo alla posa di graniglie o cementine.

Informazioni generali

Cura e manutenzione

- Per una corretta manutenzione nel tempo delle mattonelle è consigliato un trattamento preventivo idrorepellente e antimacchia da eseguire preferibilmente con prodotti specifici e da personale specializzato.
- Lo spessore (10mm) della sezione colorata nella mattonella in graniglia permette di procedere nel tempo con più operazioni di levigatura senza che la qualità del pavimento venga alterata.
- Per la cura quotidiana si consiglia una normale pulizia con detergenti neutri.
